Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5, 6, and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Bae et al. (Bae; US 2004/0055011 A1; cited by the applicants and applied for the first time in the present application).

Bae teaches the claimed communication terminal (see paragraph [0027], "mobile telephone" and figure 6), comprising:

a contents reproducing unit (see paragraph [0031], "A tuner 50 functions to receive a television signal of a channel selected under the control of the control unit 10 and perform a frequency conversion operation with respect to the received television signal" and figure 2, "50") **configured to reproduce content** (see paragraph [0033], "The display unit 80 displays output data from the control unit 10 in the communication mode and displays output television video data and user data from the video processing unit 70 respectively to the corresponding areas in the television mode. In the television mode, the display unit 80 displays the television video data from the video processing unit 70 in its first display area and the user data therefrom in its second display area, respectively");

an incoming call processing unit configured to receive an incoming call and process the incoming call (see paragraph [0034], "In an incoming call mode, the control unit 10 detects the incoming call mode through the data processor 23 and generates a ringing signal through the audio processor 25");

a watching condition determining unit configured to determine a watching condition (read as detecting that a given TV mode has been set) **of contents being reproduced** (see paragraph [0103], "Thirdly, if the communication mode is the incoming call mode at step 811 and the voice communication mode at step 813 and the OSD function is selected in the voice communication mode at step 821", paragraph [0104], "Fourthly, if the communication mode is the incoming call mode at step 811 and the voice communication mode at step 813 and the television display function is selected in the voice communication mode at step 821, the control unit 10 notifies the video processing unit 70 of information regarding these modes at step 827' and figure 12A, "821");

a control unit configured to control the reproduction of the contents and the processing of the incoming call based on the watching condition (refer again to paragraphs [0103] and [104]) **when the incoming call processing unit receives the incoming call during the reproduction of content** (see paragraph [103]).

The claimed storage unit of claims 2 and 3 reads on the MEMORY UNIT 29 of Bae.

The claimed detecting unit of claim 5 reads on the VIDEO PROCESSING UNIT 70.

The features recited in claims 6 and 8-10 are inherent to Bae and are taught via the CONTROL UNIT 10 of Bae.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The publications to Nagaoka et al. and Nakano provide additional aspects related to content provisioning in communication terminals.

Response to Arguments

4. Applicants' arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.
